

## Study Websites & Modules Powered by StudyTeam

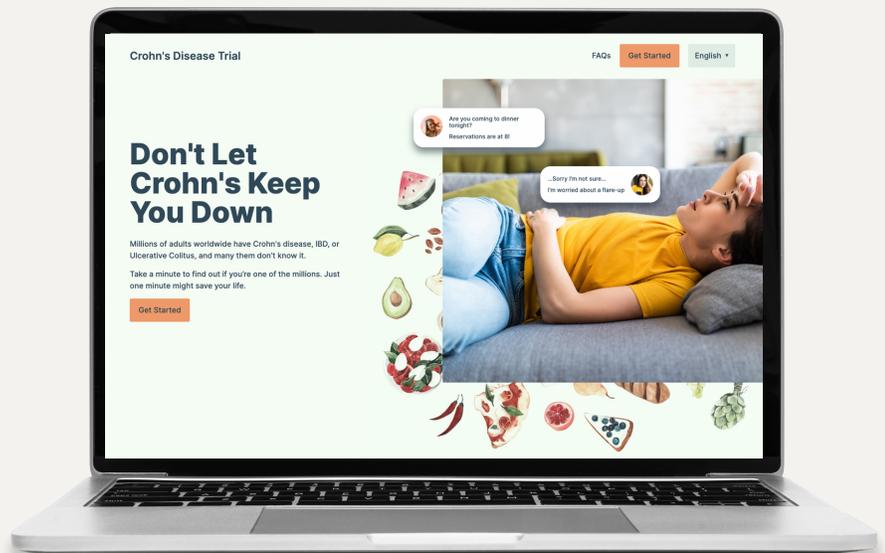

# Drive Enrollment with Study Websites & Modules

Hit enrollment goals with an online experience where patients from all sources, both site & sponsor driven, can pre-screen and sign-up for your study. With all data flowing into StudyTeam you can track and measure ROI across all your patient sources. StudyTeam powered Study Websites and Modules are custom designed, HIPAA and GDPR compliant, and available in all countries where StudyTeam is available.

## Study Websites

If you are looking for a comprehensive solution, Study Websites are full end-to-end websites designed, developed, and hosted by StudyTeam to provide interested patients with information about clinical trial offerings and connect patients directly to sites. All Study Websites can include both the Global Interactive Site Finder and the Global Pre-Screener Form Modules that are detailed below.

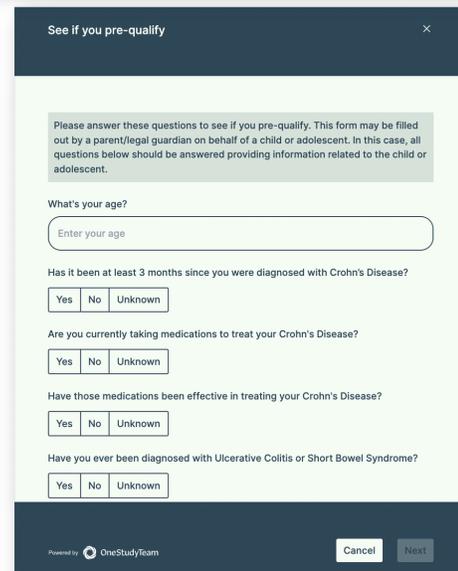

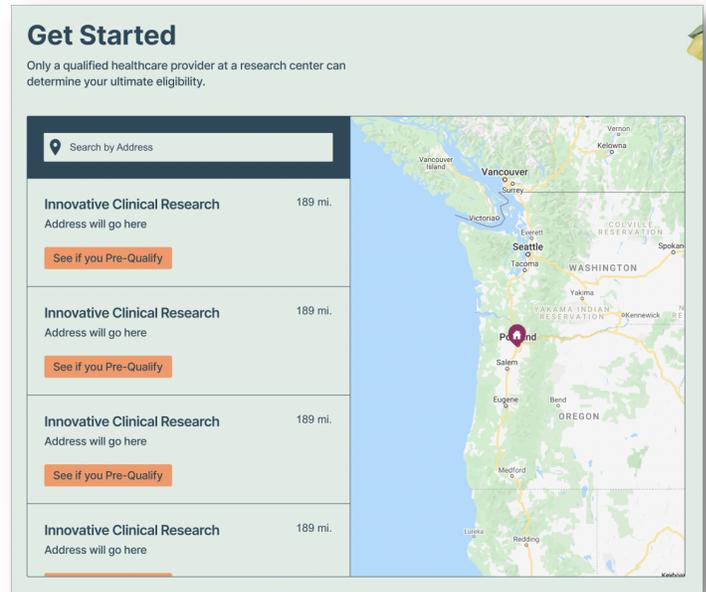

- Available for all therapeutic areas in all countries where StudyTeam is available
- Can be customized for specific studies
- Designed to optimize for patient conversion rates
- Customizable vanity URLs make it simple to send patients to an easy to recall link

## Study Website Modules

Already have a website but want to reap the benefits of our enrollment enhancing tools? Study Website Modules are interactive tools that can be embedded into any website, landing page, or trial finder page.

- **Global Interactive Site Finder:** An interactive map which allows patients to easily find clinical trial sites near their location.
- **Global Pre-Screener Form:** An easy-to-use form where patients can submit their info to see if they prequalify for a given study. The pre-screening questions and eligibility criteria are fully customizable. If the patient is considered a potential trial candidate, their information and pre-screening answers are shared with the selected trial site directly through StudyTeam.

## At A Glance...

Study Website Modules and Study Websites can be leveraged by all patient recruitment channels:

Patient Groups and Physicians can easily send patients directly to the website to enroll in a trial

Sponsors can leverage the website for any central recruitment efforts

Recruitment vendors can connect patients directly to a research site through the website

Sites can link to the website in their own advertising or social media with no need to need to complete separate IRB approvals

Study Website Modules and Study Website benefits:

- Patients: by allowing a direct connection to sites, minimizes lost patient referrals
- Sites: by receiving quality patient referrals directly into StudyTeam with no additional burden
- Sponsors: by providing a broader and more global reach of patient recruitment sources, with greater visibility to track and measure ROI of those sources
